Jan 4	—	ISM Manufacturing Index (December)
Jan 6	—	ADP Payroll Estimate (December) ISM Non-Manufacturing Index (December) FOMC Minutes (December 15-16)
Jan 8	—	Employment Report (December)

Past performance is not a guarantee of future results. There are special risks involved with global investing related to market and currency fluctuations, economic and political instability, and different financial accounting standards. There is no assurance that any trends mentioned will continue in the future. While interest on municipal bonds is generally exempt from federal income tax, it may be subject to the federal alternative minimum tax, state or local taxes. In addition, certain municipal bonds (such as Build America Bonds) are issued without a federal tax exemption, which subjects the related interest income to federal income tax. Also municipal bonds may be subject to capital gains taxes if sold or redeemed at a profit. Investing involves risk and investors may incur a profit or a loss.

US government bonds and treasury bills are guaranteed by the US government and, if held to maturity, offer a fixed rate of return and guaranteed principal value. US government bonds are issued and guaranteed as to the timely payment of principal and interest by the federal government. Treasury bills are certificates reflecting short-term (less than one year) obligations of the US government.

Commodities trading is generally considered speculative because of the significant potential for investment loss. Markets for commodities are likely to be volatile and there may be sharp price fluctuations even during periods when prices overall are rising. Specific sector investing can be subject to different and greater risks than more diversified investments.

Tax Equiv Muni yields (TEY) assumes a 35% tax rate. Municipal securities may lose their tax-exempt status if certain legal requirements are not met, or if tax laws change.
